

## **Public Sector Bodies (Websites and Mobile Applications) (No 2)**

### **Accessibility Regulations 2018**

The regulations came into force on 23 September 2018 and implemented the EU Directive on the accessibility of websites and mobile apps of public sector bodies, The purpose is to improve the accessibility of public sector websites (including Parish Council sites) so that they can be used by as many people as possible \_ this builds on the existing obligations to disabled people under the Equality Act 2010 and the duty to make reasonable adjustments for disabled people.

### **Accessibility Statement for Tarrant Hinton Parish Council**

#### **Website**

This website is run by the Parish Clerk. We want as many people as possible to be able to use this website. The website layout as text has been made as simple as possible to understand. Visitors should be able to navigate the website using just a mouse, mouse pointer and keyboard. The Government has produced an excellent guide for disabled users. This can be found at AbilityNet (<https://mcmw.abilitynet.org.uk>). It has detailed advice on making your device easier to use. This covers such things as making your screen images and text larger, using a text regulator to convert text to sound using Voice Recognition to control your computer, increasing mouse point sizes etc.etc.

## **Technical Information about this website's accessibility**

Tarrant Hinton Parish Council is committed to making its website accessible, in accordance with the Public Sector Bodies (Websites and Mobile Applications) (No2) Accessibility Regulations 2018. This website is partially compliant with the Web Content Accessibility Guidelines version 2.1

(<https://www.w3.org/TR/WCAG21/>)AA standard. Following a detailed examination of our website's features against the detailed government checklist we have identified some area where we are not compliant.

+It is not possible to navigate the website purely by keyboard.

+There is only one way to find content (i.e. no search engine)

+ARIA\* (see below for definition) markup has not been used.

+ Where extra content is shown or hidden on focus, it cannot be dismissed, interacted with (and not disappear when the user moves to it) and does not stay visible until dismissed by the user.

These items have been discussed with our Website designers who are currently working on a rebuild which will incorporate ARIA markup standards and make us fully compliant.

## **How we tested this website**

The website was tested on 27 August 2020. The test was carried out by the Parish Clerk. We used WCAG2.1 level AA Primer, published by Gov.UK as our checklist. A copy of the checklist questions and the responses are shown at the end of this statement.

## **What to do if you cannot access part of this website:**

If you need information on this website in a different format like PDF, large print etc. please contact the Parish Clerk. We will consider your request, and will get back to you in 10 working days. If you cannot view the map on our “Contact us” page, please contact for directions.

## **Reporting accessibility problems with this website**

We are always looking to improve the accessibility of our website. If you find any problems that are not already listed, or you think we are not meeting the accessibility requirements, contact the Parish Clerk.

## **Enforcement Procedure**

The Equality and Human Rights Commission (EHRC) is responsible for enforcing the Public Sector Bodies (Website and Mobile Applications) (No2) Accessibility Regulations 2018 (the accessibility regulations). If you are not

happy with how we respond to your complaint, contact the Equality Advisory and Support Service (EASS) (<https://www.equalityadvisoryservice.m>).

This statement was prepared on 7 September 2020 by The Parish Clerk

### **\*Definition of ARIA**

WAI-ARIA, the Accessible Rich Internet Applications Suite, defines a way to make the Web content and Web applications more accessible to people with disabilities. It helps with dynamic content and advanced user interface controls developed with Ajax, HTML, JavaScript and related technologies. Currently, certain functionality used in Web sites is not available to some users with disabilities, especially people who rely on screen readers and people who cannot use a mouse. WAI-ARIA addresses these challenges, for example, by defining new ways for functionality to be provided to assistive technology. With WAI-ARIA, developers can make advanced Web applications accessible and usable to people with disabilities.
